Index Alphabetical 468

Index by Difficulty 476

“Super well researched and detailed, this edition offers so many new routes. The challenge will be what to do first!”
- Jay Conway *Multi-Pitch Pioneer*

“Growing up in North Conway, I didn't fully appreciate how good the climbing here is until I traveled far and wide. Returning to raise my family after more than a decade away, I can honestly say that the climbing in this region is as good as any traditional area in the country. Factor in the winter terrain and overall ease of access and it's better than most! The new guide is an indispensable resource for climbing in this region. With all the new route development in recent years, this new edition is a must-have for your climbing library.”
- Jim Surette *'80s Groundbreaker*

“From the Granite State of 'live free or die' to the hidden gems of Maine's spectacular schist crags. Get a hold of this guide. Get out, get lost, and get some! 'The way life should be.'”
- Ray Rice *Leading Modern Developer*

“Having traveled to most of the iconic climbing areas of the world, I consider the Mount Washington Valley as Mecca. The area is steeped in history, strong trad climbing ethics, yet boasts great sport climbs and is one of the best winter climbing spots on the planet. It is not a place to be missed nor is this guidebook that covers it so well.”
- Henry Barber *'70s Climbing Icon*

Steeped in history, the North Conway area and western Maine boast an exceptionally diverse collections of routes – from gripping near-vertical gear battles, to steep sport thuggery, to a plethora of great beginner and moderate trad climbs on sweeping roadside crags and off-the-map adventure walls.

This guide covers the entire region with stunning photographs, detailed maps, and meticulously researched text. It's the one resource for all you need to know to get the most out your time, whether you're a long-time local or simply visiting.
